

What Is the Life Miracle® Magnetic Laundry System?

QA The Laundry System is an amazing patented and independently proven breakthrough in functional green technology that allows you to wash your clothes using the power of renewable magnetic force, rather than non-renewable chemicals.

Why Should I Use It?

QA You will gain many benefits from your decision to use the Laundry System. Here are just a few of them:

Health Benefits: If you are one of the 33% of the population that suffers from chemical sensitivities or allergies, you may find relief if the cause of your suffering is the petrochemicals found in detergents. Many people suffer skin and respiratory reactions from the petrochemicals imbued in their clothes, or the perfumes and synthetic scents used in many laundry products.

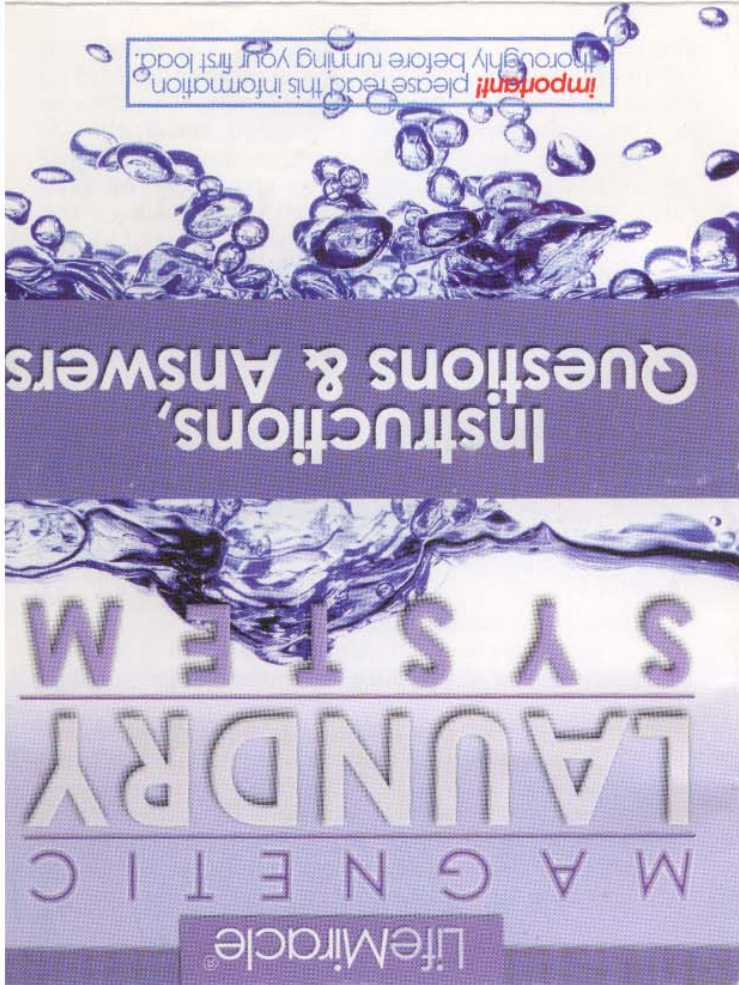

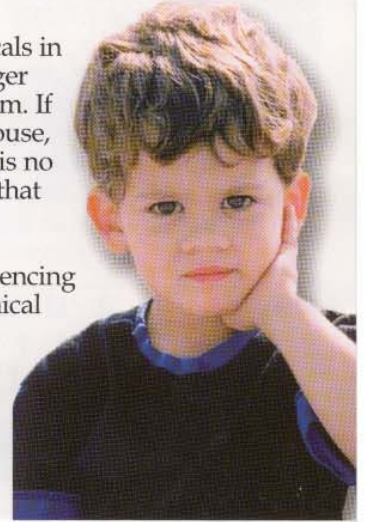

Convenience: You will find that using these portable laundry units is a significantly easier and more convenient than lugging large, heavy detergent containers from the store. You just place the laundry units in your washer and turn it on. It is also great for people who use laundromats and people who live in apartments and dorms.

The Environment: Detergents are not soaps. They are actually petrochemicals derived from crude oil. Less petrochemicals being dumped into our fresh water supply means a cleaner environment, and cleaner water when it is recycled back to our home. Imagine the positive impact of just one person not flushing petrochemical detergents into the environment day after day, year after year. One person who cares *can* make a difference!

Save Money: For many, the money they will save by switching to the Laundry System is incentive enough. For a family doing a few loads per day, the savings can be profound. With crude oil/detergent costs reaching all time highs, a family could save \$400 or more every year on detergent expense, and even more as oil prices rise!

Do It For Them: Less chemicals in a household means less of a danger your children can get hurt by them. If you have small children in the house, you can rest easy knowing there is no petrochemical detergent around that they can mistakenly consume.

Additionally, they may be experiencing health challenges related to chemical use. The freer your home is from toxins, and the less chemicals you breathe in and have on your skin, the healthier you and your family will be.

How Do I Use the Laundry System?

QA It is very easy. When you are ready to wash, place clothes into the washing machine with enough for a normal load and place the Life Miracle® Laundry System units on opposite sides of the agitator. Set the washing machine to whatever setting you normally use and start the machine.

The water temperature setting of hot has shown to achieve the best results with the Life Miracle® Laundry System, but you may use any temperature you wish.

The Life Miracle® Laundry System units may remain in the washing machine throughout all cycles.

When final cycle is completed and machine shuts off, remove the Life Miracle® Laundry System units and set them aside to use with the next load of clothes. The units most likely will be attracted to one another in the machine. This is completely normal and does not adversely affect their cleaning performance.

Note: For additional optional savings, you can manually bypass the rinse cycle right before it turns on. Since there are no chemicals used in the process, you have no chemicals to rinse out. This can save up to 40 gallons of water and all of the electricity, heat and sewage to run the rinse cycle. It all adds up to very big savings over time. Many newer washing machines can be programmed to bypass the rinse cycle automatically. Contact your machine's manufacturer for instructions.

Can I Use Chemicals In the Wash With the System If I Choose To Do So?

QA The Laundry System is a detergent replacement only, and you may wish to continue to use the additives you currently use. Using bleach, liquid or sheet fabric softeners, pre-treat stain removers or even detergent with the Life Miracle® Laundry System will not be detrimental to the units. But be aware that using chemicals may reduce some of the substantial health and environmental benefits the Laundry System offers. It is safe to use diluted bleach directly with the System. An good alternative to chlorine bleach is oxygen based bleach now found in many stores.

A good stain pretreating product is suggested for really tough, set in stains. We created an all-natural enzyme spot remover for this purpose. Use of baking soda may also help to boost the cleaning action of the Laundry System, and white vinegar is recommended to kill bacteria and germs in lieu of bleach.

There is no scent when using the Laundry System. Therefore you must weigh your need for a perfumey smell vs. the health and environmental factors of adding a dryer sheet for this purpose.

Can I Use the Laundry System In Front Loading Washing Machines?

QA Absolutely. We do recommend that front loaders have a full load before running with the Laundry System. The spinning horizontal axis may cause added stress to the Laundry System units without a full load of laundry. As an alternative to a full load, you can place each of the units inside a durable piece of clothing such as pants pockets or pair of socks to provide further protection. This will not adversely affect the cleaning action.

Care & Maintenance

If you are using your own washing machine, you may leave the Laundry System units inside the water drum for their next usage. If you use community laundry facilities, remove them and store in a safe place for next usage. The ends of the Laundry System units may become slightly discolored over time because of removal of metal, etc. in clothing. This is normal. They can be completely cleaned by scrubbing them a little with water and a washcloth.

WARNING: Do not bring the Life Miracle® Laundry System near TVs, computers, computer disks and monitors, audio/video tapes, digital devices, pacemakers, or anything else that is adversely affected by magnetic fields. Do not place Laundry System units in mouth, throw the units, cut them open, or use them for anything other than their intended purpose of washing clothes. We are not liable for any of the above abuses, and such abuse voids the Lifetime Warranty.

L i m i t e d L i f e t i m e W a r r a n t y

The Life Miracle® Laundry System is guaranteed to perform as long as you own it. If the system breaks down in the purchaser's lifetime, simply send it back to us and we will repair or replace the unit(s). Warranty is voided if units are used for any application other than laundry usage or if warning notice (above) has been disregarded. The Laundry System is not a toy. Keep it out of the reach of children. Warranty claims must be accompanied by \$8.95 USD for shipping and handling (\$17.95 USD for customers outside of the U.S.A.), the original box, and dated receipt or some other proof of purchase. Pre-registration with the enclosed warranty registration card is mandatory. The warranty mailing address is on the back of this brochure.
